WORK EXPERIENCE

SENIOR SOFTWARE DEVELOPER

[Scotia Digital](#) | Oct 2021 – Present

- Working on front-end tasks using primarily react
- Working on back-end tasks using primarily node and express
- Reviewing PRs and approving them if they meet the required standard
- Merging PRs, submitting builds and deployments
- Writing unit tests using jest

SENIOR DEVELOPER

[Elite Digital Agency](#) | Feb 2019 – Oct 2021

In addition to my responsibilities from my previous role at Elite, I:

- Oversaw and lead a team of 6 front-end and full-stack developers
- Lead multiple projects as the lead developer
- Received day to day reports from the developers who I oversaw
- Optimized code previously written by other developers
- Provided new and improved solutions to problems that weren't fully solved
- Reviewed PRs on a daily basis

FULL-STACK DEVELOPER

[Elite Digital Agency](#) | Oct 2017 – Feb 2019

- Creating full-stack web applications for online contests held by our clients all over Canada.
 - Handling a large number of entries per day and users per week.
 - Creating reporting systems for our contests with multiple exporting functions and formats as per the customer's needs.
 - Converting frameworks and designs to fully functional WordPress templates and/or full-stack web applications built on top of frameworks.
 - Optimizing pre-written code and debugging previously built projects on a daily basis.
 - Writing complex SQL queries for enhancing database functionality.
 - Creating fully customized WordPress templates using hooks, custom functions, custom plugins, etc.
 - Working with numerous back-end PHP frameworks such as Laravel, Code Igniter, Phalcon, CakePHP and more on a day to day basis.
 - Creating full-stack pin management web software for the contests.
 - Worked with clients who deal with large numbers of databases.
-
